AUTHOR INDEX

Alwen, J.J., & Rosser, R.M., Abstracts of papers presented at the Sixth International Symposium on Respiratory Psychophysiology, 73
Ankaoua, J., *see* Gallego, 87
Bagnall, P., Heslop, A., Cockcroft, A., & Guz, A., Controlled trial of a respiratory nurse in the management of patients with chronic respiratory disability (Abs.), 79
Barry, R.J., & O'Gorman, J.G., Stimulus omission and the orienting response: Latency differences suggest different mechanisms, 261
Bass, C., *see* Chambers, 88
Beaumont, J.G., Book review, 100, 102
Bernards, J.A., *see* Gelissen, 84
Binkhorst, R.A., *see* Gelissen, 84
Birkett, P., Book review, 96
Bonnet, M.H., & Rosa, R.R., Sleep and performance in young adults and older normals and insomniacs during acute sleep loss and recovery, 153
Bowcock, S.A., *see* Mooney, 91
Bozman, A., *see* Smith, 247
Brown, K., Book review, 93
Butler, C.L.E., An experimental study comparing psychophysiological processes in asthmatic and non-asthmatic subjects (Abs.), 89
Butterworth, G., Book review, 98
Cacioppo, J.T., Tassinary, L.G., Stonebraker, T.B., & Petty, R.E., Self-report and cardiovascular measures of arousal: Fractionation during residual arousal, 135
Camus, J-F., *see* Gallego, 87
Cantrell, P., *see* O'Rourke, 11
Chambers, J., Kiff, P., Gardner, W., & Bass, C., End-tidal pCO2 on exercise in patients with non-cardiac chest pain (Abs.), 88
Chambille, B., *see* Gallego, 87
Cockcroft, A., *see* Bagnall, 79
Cockcroft, A., *see* Lane, 81
Coltheart, M., Book review, 105
Conway, A., Freeman, L.J., & Nixon, P.G.F., Personality and trigger factors in the hyperventilation syndrome (Abs.), 78
Cooke, E.D., *see* Mooney, 91
Ditto, B., Miller, S., & Maurice, S., Age differences in the consistency of cardiovascular response patterns in healthy women, 23
Folgering, H.T.M., *see* Gelissen, 84
Folgering, H., & Snik, A., EMG-fatiguability of muscles in hyperventilation patients (Abs.), 75
Freeman, L.J., *see* Conway, 78
Freeman, L.J., King, J.C., & Nixon, P.G.F., Hyperventilation in patients admitted to the coronary care unit (Abs.), 74
Freeman, L.J., Pinney, S., & Nixon, P.G.F., The role of the nurse counsellor in patients with the hyperventilation syndrome (Abs.), 78
Gallego, J., Ankaoua, J., Camus, J-F., Chambille, B., Vardon, G., & Jacquemin, C., Optimization of knowledge of results in a ventilatory motor task (Abs.), 87
Gardner, W., *see* Chambers, 88
Gelissen, H.P.M.M., Folgering, H.T.M., Binkhorst, R.A., & Bernards, J.A., Normal, abdominal and thoracic breathing in normal subjects (Abs.), 84
Goldwater, B.C., & Van Doren, J., The effects of selective inattention upon the electrodermal orienting reflex: A test of information-processing theory, 119
Guz, A., *see* Bagnall, 79
Guz, A., *see* Lane, 81
Hagelberg, R., *see* Richter, 86
Harsh, J., *see* O'Rourke, 11
Heslop, A., *see* Bagnall, 79
Hibbert, G., *see* Pilsbury, 82
Hibbert, G., & Pilsbury, D., Preliminary re-

SUBJECT INDEX

Attention, 33, 119
  and electrodermal activity, 119
  and event-related potentials, 33
  and inattention, 119
  divided, 33
  focussed, 33
  spatial, 33
Blood pressure, 23
  and age effects, 23
  and stress, 23
  diastolic, 23
  systolic, 23
Cardiac responding, 1, 119, 135
  and age differences, 23
  and arousal, 119, 135
  and personality, 1
  and seriousmindedness, 1
  and stress, 23
  and Type A behaviour, 1
Electrodermal activity, 119, 247, 261
  and attention, 119
  and inattention, 119
  and hemispheric asymmetry, 247
  and orienting, 119, 261
Event-related potentials, 33, 61, 173, 221
  and divided attention, 33
  and focussed attention, 33
  and N2, 33
  and P3, 173, 221
  and P300, 61
  and P3b, 33
  and reaction time, 33
  and sentence verification, 173
  in a counting task, 221
Hemispheric asymmetry, 247
  and cognition, 247
  and EEG activity, 247
  and electrodermal activity, 247
  and emotion, 247
  and gender, 247
Insomnia, 153
  and age, 153
  and performance, 153
  and sleep loss, 153
  and sleep recovery, 153
Muscle tension, 11, 211
  and respiratory resistance, 211
  during sleep, 11
  facial muscle tension, 211
  feedback of, 11, 211
  frontalis, 211
  masseter, 11
Orienting response, 119, 261
  and electrodermal activity, 119, 261
  and inattention, 119
  and stimulus omission, 261
  involuntary responses, 261
  voluntary responses, 261
Personality, 1
  and cardiac responding, 1
  and seriousmindedness, 1
  and Type A behaviour, 1
Sleep, 11, 153
  and age, 153
  and insomnia, 153
  and masseter muscle tension, 11
  and performance, 153
  and sleep recovery, 153
  loss of, 153
Stress, 23
  and age effects, 23
  and cardiac responding, 23
Type A behaviour, 1, 107
  and cardiac responding, 1
  and hyperventilation, 107
  and mental task load, 107
  and pulse transit time, 1
Visual search, 33
  and divided attention, 33
  and event-related potentials, 33
  and focussed attention, 33
  and spatial attention, 33
